## RO-4 WHOLE HOME REVERSE OSMOSIS

### BETTER WATER STARTS HERE

#### GALENE'S RO-4 WHOLE HOME REVERSE OSMOSIS

series is based on Reverse Osmosis technology, the highest level of filtration grade in the market, delivering the most effective contaminant removal.

The RO-4 Series comes complete in a 4 stage configuration to include:

- Pre Treatment Assuring Conditioning of the Water Preventing Premature Failure of the Membrane
- RO Skid Including Micron Filtration, Booster Pump, RO Membranes and Instrumentation
- Finished Water Holding Tank with Repressuring Booster Pump and Pressure Tank
- Ozone Disinfection System
- Post Carbon/Calcite Filter for PH Correction and Improved Taste

The major benefits of the RO-4 Series is its capacity to reduce:

- Sediments and Rust
- Chlorine Odor and Taste
- Lead and Other Heavy Metals
- Fluoride
- Pesticides
- Bacteria
- Parasitic Protozoan Cysts
- Volatile Organic Carbons
- MTBE
- PFAS, DBP's (Disinfection by Products), Halomethanes

In addition, GALENE's RO systems treat a large variety of heavy metals with above 95% efficiency removal of contaminants such as; Aluminum, Arsenic, Barium, Cadmium, Calcium, Chloride, Copper, Cyanide, Sodium Magnesium, Manganese, Mercury, Nitrate, Phosphate, Silver, and Zinc.
